Vaibhav Giri

Full Stack Web Developer

Professional Summary

Dynamic Full Stack Web Developer skilled in JavaScript and the MERN stack, specializing in designing efficient server-side APIs and ensuring seamless integration between components. Expertise in Generative AI, quick adaptation to new tech stacks, and strong collaborative and problem-solving abilities for enhancing web applications.

Projects

Costco-Colne [Live Demo Link](#) [Github Repo Link](#)

- React
- Redux
- Git
- Responsive Web Design
- Chakra UI
- vite

- Developed a responsive e-commerce application replicating the Costco shopping experience using React and Redux.
- Implemented user authentication, product sorting, cart functionality, and used Chakra UI for adaptable styling.
- Integrated React Router for seamless navigation and managed version control through GitHub.

Food Recipe Web [Live Demo Link](#) [Github Repo Link](#)

- JavaScript
- HTML5
- CSS3
- Responsive Web Design

- Built 'Meal Master', a web application using JavaScript and an external API for recipe searching.
- Users can search recipes based on ingredients, cuisine, or meal type; integrated meal planning feature.
- APIs provide real-time data, allowing informed dietary choices with calorie displays.

Food Recipe Web [Live Demo Link](#) [Github Repo Link](#)

- JavaScript
- HTML5
- CSS3
- Responsive Web Design

- Developed a dynamic web application using JavaScript, HTML, CSS to provide a seamless user experience.
- Implemented user-friendly search functionality to filter recipes by ingredients, cuisine, or meal type, enhancing user engagement.
- Integrated external recipe APIs to offer users updated and real-time recipe suggestions.
- Designed and implemented a meal planning feature, allowing users to create customized meal plans.
- Ensured the application was responsive and accessible across various devices and browsers to improve user satisfaction.
